Aug 2025 - Apr 2026

PT. Pertamina Geothermal Energy Tbk.

- IT Intern at PT Pertamina Geothermal Energy Tbk, building an internal app to improve team efficiency.
- Involved in end-to-end development: ideation, design, coding, and testing.
- Strengthened practical skills and experience as a software developer.

Creative Director, Mention

Oct 2024 - Feb 2026

SMK TI BAZMA

- Led the creative team in developing branding concepts and visual identity for clients.
- Directed content creation, promotional design, and brand communication strategies.
- Coordinated team workflows to ensure consistent and impactful creative outputs.

Projects

Cyberdome

April 2026

Fullstack Dev. | Next.js, Express.js, Socket.IO, Wazuh, PostgreSQL

- Developed a real-time Cyber Threat Map dashboard to visualize live cyber attacks.
- Designed a low-latency streaming pipeline from Wazuh SIEM endpoints to the dashboard using real-time transport (WebSocket/SSE)
- Architected admin panel for dynamic API and endpoint management.

Xinna

February 2026

Fullstack Dev. | Next.js, Express.js, Prisma Studio

- Xinna is a modern Health-Tech application built with Next.js & Prisma, serving as both a pharmacy inventory management system and marketplace.
- It features an AI Health Agent (Google Gemini) for real-time symptom consultation.
- Designed with Framer Motion and GSAP, it delivers a smooth, premium, and high-performance user experience.

SMK TI BAZMA Website

September 2024

Front-end Dev | Next.js

- Developed the official school website using Next.js with a responsive and modern design.
- Created dynamic sections to showcase school programs and achievements.
- Focused on clean UI, reusable components, and smooth navigation.
